**Name: S.Divyadharshini**

**Register Number: 811519106040**

### **Question:**

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature

### **PROGRAM**

```
Import random
While(True):
    temp=random.randint(10,99)
    humid=random.randint(10,99)
    print("current temperature : ", temp)
    print("current humidity : ", humid,"%")
    temp_ref=60
    humid_ref=37
    if temp>temp_ref and humid<humid_ref:
        print("sound alarm")
    else :
        print("sound off")
        break
```
